Professional Summary

Senior Full Stack Developer with over 10 years of experience building high-performance, scalable web applications for international teams. Expert in the React ecosystem, specifically Next.js and TypeScript, with a proven track record of leading migrations for high-traffic platforms (5M+ monthly visits). Proficient in comprehensive full-stack development, with deep expertise in backend technologies including Node.js, Python, and Go. Strong background in clean architecture, performance optimization, and team leadership, including mentoring and technical recruitment. Fluent in English and Portuguese, with professional proficiency in French.

Professional Experience

Senior Frontend Developer | Britehouse

January 2019 – March 2026 | Johannesburg, South Africa (Remote)

- Led the architecture and migration of a high-traffic sports platform (5M+ monthly visits) to Next.js/React, achieving 40% faster load times through SSR/SSG.
- Optimized cloud infrastructure with edge caching and strategic pre-rendering, reducing server costs by 25% while maintaining peak SEO performance.
- Implemented robust CI/CD pipelines via GitHub Actions and automated testing (Jest/Playwright), ensuring 99.9% uptime and 85% test coverage.
- Built interactive data visualization dashboards with D3.js and Chart.js, enabling data-driven insights and improving operational reporting.
- Established scalable component libraries with Tailwind CSS and Storybook, reducing technical debt while mentoring 5+ developers to improve team velocity.
- Optimized backend microservices using Go and Python for high-performance data processing and improved system reliability.

Web Team Lead | Cellcrypt

August 2017 – November 2018 | Florianópolis, Brazil

- Led a critical product rewrite using TypeScript, Node.js, and Python-based API development, increasing system stability by 50% while significantly reducing data processing latency.
- Enhanced backend performance and data retrieval efficiency via Redis caching, cutting enterprise response times by 35%.
- Built secure, high-performance Electron applications for encrypted messaging and video conferencing, ensuring strict compliance with enterprise security standards.
- Developed an administrative Group Management Portal using React and Material-UI to streamline enterprise workflows and improve user management efficiency.

Web Developer | Geo Innovations

March 2017 – August 2017 | Florianópolis, Brazil

- Spearheaded a monolithic-to-React migration, modernizing the stack with TypeScript and MongoDB to drastically enhance code maintainability and scalability.
- Replaced legacy jQuery dependencies with a modern, modular styling architecture that reduced visual inconsistencies and style conflicts by 40%.
- Automated deployment and environment management processes, successfully shortening release cycles by 15% for new frontend updates.
- Collaborated across the full software development lifecycle to modernize infrastructure, ensuring a seamless transition for the core company portal.

Software Development Scholar | LAPIX – INCOD

August 2012 – November 2014 | Florianópolis, Brazil

- Refined rendering pipelines for volumetric data visualization, utilizing WebGL to improve processing efficiency by 35% for large datasets.
- Implemented unit testing for complex 3D graphics modules to ensure high-performance reliability in research applications.
- Managed deployment configurations for research lab tools, ensuring environment consistency across developer workstations and staging environments.
- Standardized component styling and UI architecture for data interfaces, reducing development time for new visualization features by 20%.

Core Technical Skills

- **Frontend:** React, Next.js, TypeScript, JavaScript (ES6+), Vue.js, Tailwind CSS, Material-UI, Storybook, WebGL, Electron.js.
- **Backend:** Node.js, Python, Go, Express.js, MySQL, MariaDB, MongoDB, GraphQL, REST APIs.
- **Cloud & DevOps:** Azure, AWS, GitHub Actions, Docker, Linux, Git.
- **Design & Workflow:** Figma, Chromatic, Agile/Scrum, Atlassian Suite (Jira/Confluence).
- **Libraries:** Redux, Zustand, Socket.io, D3.js, Chart.js, Mapbox GL, Leaflet.
- **Testing:** Jest, Vitest, Cypress, Playwright.

Education

BSc in Computer Science | Federal University of Santa Catarina (UFSC) March 2009 - October 2023
